

BHAVISHYA YAGIK

Permanent Address: Hurawali Tiraha, Morar, Gwalior (M.P), 474006

Phone: +91-9981887395 **Email:** bhavishyayagik@gmail.com

CAREER OBJECTIVE

Tech-savvy fourth-year Computer Science student specializing in **Artificial Intelligence**, with hands-on experience in **Machine Learning and NLP**, and full-stack web development. Eager to apply analytical and problem-solving skills to real-world data challenges, and committed to delivering high-quality results in a fast-paced technical environment.

ACADEMIC QUALIFICATION

- **B.Tech in Computer Science** (Minor: Artificial Intelligence) — Amity University, Gwalior (M.P.) | CGPA: 6.8

INTERNSHIPS

Machine Learning Intern | Unified Mentor Pvt. Ltd.

July 2025 – August 2025 (1 month)

- Completed a hands-on internship focused on Machine Learning workflows and data-driven solutions.
- Built and tested ML models, covering the full pipeline from data preprocessing to predictive analysis.
- Recognized by senior management for consistent and hard-working performance throughout the internship.
- Collaborated in a corporate environment to understand the practical lifecycle of AI projects.

PROJECTS

Muskaan.ai — Residential Architecture Planning Platform | Full-Stack (Node.js, JavaScript)

- Objective: Built and deployed a full-stack web platform that generates 10 algorithmically-computed residential floor-plan layouts from a user's plot dimensions, with 2D blueprints and 3D isometric views.
- Functionality: Designed a room-allocation (guillotine-partition) algorithm, multi-floor (G / G+1 / G+2) plan generation, a Vastu compliance scorer, a construction cost estimator, side-by-side layout comparison, PDF export, and WhatsApp sharing.
- Tech Stack: Node.js, Express, JWT authentication, REST APIs, vanilla JavaScript/HTML/CSS frontend; deployed with backend on Render and frontend on Netlify.
- Impact: Delivered a complete, live product end-to-end — algorithm design, REST API and auth, and production deployment — demonstrating full-stack ownership beyond ML-only projects.

Zeus — AI Class Companion | Full-Stack (Node.js, JavaScript, Groq/LLM API)

- Objective: Built an AI-powered app that turns live lecture speech and slide text into clean, structured, exam-ready notes, so students can focus on listening instead of transcribing.
- Functionality: Implemented browser-based live speech-to-text capture (Web Speech API), a Node.js/Express backend that sends transcripts and slide content to an LLM (Groq, Llama 3.3 70B) to generate structured Markdown notes with headings, key-term highlights, Exam Alerts, a Quick Recap, and Possible Questions; notes are saved per-lecture and downloadable as Markdown.
- Tech Stack: Node.js, Express, REST APIs, Groq LLM API, vanilla JavaScript/HTML/CSS frontend, JSON file-based storage.
- Impact: Delivered an end-to-end AI product — live capture, prompt design, backend API integration, and persistence — showcasing applied LLM/NLP integration alongside full-stack development.

AI Chatbot “FRIDAY” | Python & Full-Stack

- Objective: Developed an interactive AI voice assistant capable of processing user queries and providing vocal responses.
- Functionality: Implemented Speech Recognition and Text-to-Speech modules for real-time, human-like interaction.
- Tech Stack: Python (Backend), HTML, CSS, JavaScript (Frontend), Speech Recognition Libraries.
- Impact: Streamlined user interaction through voice-automated commands and cross-platform integration.

Interactive Quiz Website | Frontend Development

- Objective: Designed and developed a responsive web application for online assessments.
- Functionality: Dynamic question rendering, category-based selection, and instant score calculation.

- Tech Stack: HTML5, CSS3, JavaScript.
- Impact: Strengthened understanding of UI/UX principles and responsive web design.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, C++ — with strong fundamentals in DSA and OOP
- Web & Backend: Node.js, Express, REST APIs, JWT authentication, Git/GitHub, deployment (Render, Netlify)
- Machine Learning: Model building, data preprocessing, predictive analysis, NLP
- Databases: MySQL
- Operating Systems: Windows, Linux

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional — Generative AI, LLMs, and cloud-based AI solutions
- Artificial Intelligence (AI) – HP LIFE Certification — AI applications in business, automation, and strategic data utilization
- Software Engineering – Saylor Academy — Fundamentals of software engineering principles and development lifecycles
- Machine Learning Internship Certificate – Unified Mentor — Awarded for consistent, hard-working performance

LANGUAGE SKILLS

- English, Hindi (Fluent)
- French (Rudimentary)
